

SETTING THE GLOBAL STANDARD FOR VERIFIED SUSTAINABILITY

WHO IS ECOVERIFY?

About Us

EcoVerify is Ireland's premier sustainability assurance body and the first in the world accredited under ISO 14068-1 to verify carbon neutrality and Net Zero Pathways. Founded by sustainability expert Laura Mora and backed by a global team of climate professionals, EcoVerify helps businesses, from SMEs to multinationals, move beyond green claims to trusted, verified sustainability. As the only accredited provider in Ireland under ISO 17029, ISO 14065, and ISO 14064-3, we ensure integrity and transparency in line with international standards, enabling us to operate across the EU and beyond.

What we do?

EcoVerify delivers independent, high-assurance services to validate and verify sustainability claims in line with internationally recognised standards. We support organisations with carbon footprint verification, Net Zero strategy, sustainability assurance, and validation under voluntary SME frameworks (VSME), with full alignment to CSRD requirements.

Our work helps businesses produce credible, transparent ESG disclosures, turning sustainability into a strategic advantage.

Through the EcoVerify Academy of Sustainability, we provide expert-led training programmes that build internal capability in carbon accounting, GHG management, and sustainability reporting. Designed for SMEs and larger enterprises alike, our courses support Net Zero planning, ESG leadership, and CSRD readiness.

EcoVerify is Ireland's leading provider of:

- **Carbon Footprint & Net Zero Pathway Verification**
- **Independent Sustainability Assurance**
- **Practical, Business-Focused Sustainability Training**

What we can Verify?

We provide impartial verification of environmental data and sustainability claims to ensure they are accurate, credible, and aligned with globally recognised frameworks.

EcoVerify validates and verifies:

01

Carbon Footprints
(Scopes 1, 2, and 3)

02

Net Zero Pathways and
carbon neutrality claims

03

GHG emissions
inventories and
reduction strategies

04

Sustainability reports
under frameworks like
CSRD, VSME, ESRS, and
ISO standards

05

Environmental data
related to ESG
commitments and green
finance eligibility

What we cannot Verify?

Our role is independent and unbiased - to safeguard your credibility through verifiable truth, not promotional spin.

EcoVerify cannot validate and verify:

01

Certify unsubstantiated or incomplete data

02

Verify sustainability claims without robust supporting evidence

03

Act as a consultant on a claim we later verify (to ensure impartiality)

04

Validate marketing language not grounded in measurable sustainability metrics

Our Services

Our comprehensive services include:

- Validation and Verification of sustainability data and claims
- Independent Assurance aligned with VSME, CSRD, and ESRS requirements
- Net Zero Pathways Design & Verification under ISO 14068-1
- Carbon Neutrality Verification following PAS 2060 and ISO 14064-1
- EcoVerify Academy of Sustainability: Tailored training on sustainability reporting, GHG management, and climate governance for SMEs and corporates alike.

Why Verification Matters?

Validated & verified sustainability claims are essential - not only for compliance but for building long-term credibility and competitive advantage. Independent third-party verification ensures your environmental and ESG disclosures are accurate, robust, and aligned with international expectations. This protects against the risks of greenwashing, enhances transparency, and builds trust across your stakeholder network, from regulators and investors to customers and supply chain partners.

THE BENEFITS OF VERIFICATION INCLUDE:

- **Stronger B2B Relationships:** Verified data positions you as a preferred supplier for organisations seeking ESG-aligned partners under EU legislation and procurement standards.
- **Increased Consumer Trust:** Transparent, validated claims reassure customers and strengthen brand reputation in B2C markets.
- **Access to Sustainable Finance:** Lenders and investors increasingly prioritise companies with independently verified sustainability credentials.
- **Regulatory Risk Reduction:** Stay ahead of tightening compliance expectations and avoid penalties linked to misleading claims.
- **Market Differentiation:** Demonstrate leadership by setting the benchmark in a space where credibility is under scrutiny.
- **Improved Internal Performance:** Verification drives better data quality, governance, and decision-making across sustainability initiatives.

Join Us in Driving Sustainable Change

Invest in EcoVerify to champion transparency, combat greenwashing, and support organisations in their sustainability journey.
